## Beehive Beeswax Candle

### What You Need

Honeycomb Beeswax Sheet  
#2 Cotton Braid Wick  
Exacto Knife  
Hairdryer

Finished candle measures approximately 2.5" in diameter x 3" tall. Burns 6 hours.

### How To Make It

- 1) Place the beeswax sheet on a cutting mat or piece of cardboard.
- 2) Using an exacto knife cut the sheet into 5 pieces using the measurements below.
- 3) Gently warm the strips of beeswax with a hairdryer to make them easier to roll.
- 4) Lay the wick along the 3" edge of piece "A" with 1/2" sticking out the top.
- 5) Fold the edge of the wax over the wick and start to roll. Make sure to keep the straight edge (bottom of the candle) even. Use firm even pressure to roll.
- 6) Take piece "B" and line the 2.5" edge to the 2.5" seam of the piece you've just rolled.
- 7) Add pieces "C", "D" and "E" in the same manner. When finished, the end of piece "E" will be at the bottom of the candle. Press this firmly to seal it in place.
