Fruit Pie Candle

What You Need

3" Pie Plate

Wick Stickum or Hot Glue

One Votive Zinc Wick

Wax Fruit - 1lb (strawberry, raspberry, cherry, blueberry, peaches)

One Pie Crust (Shell Topper or Lattice)

1/4lb of High Density Gel

10ml Scent

How To Make It

Place the wick stickum on the bottom of the wick and center in the pie plate.

Place fruit around wick, keeping it level with the pie plate. It cannot stand higher than the edge of the pie tin or the crust will not fit on.

Heat the gel on direct heat in a candle pour pot. **DO NOT WALK AWAY.** Stir the gel until it becomes the consistency halfway between corn syrup and water. Add scent and stir well. Cover the fruit to the very edge of the pie tin and quickly add the crust. The crust should attach to the pie tin and fruit with the gel. For the shell topper, apply a piece of accent fruit by dipping the fruit in gel and adhering to pie crust

That's it! Trim wick to 1/4" and enjoy.
