Woven Beeswax Pillars

What You Need

Core Candle

1 Sheet Smooth Beeswax

Ruler

Exacto Knife

Heat Gun or Hair Dryer

How To Make It

Cut beeswax sheet in half lengthwise. On one side, mark and cut 1" strips horizontally. With the other side, mark and cut 1/2" strips. Using a basic basket weave pattern, weave strips into a sheet. You may have to lightly heat the strips with the heat gun or hair dryer to soften the wax and make it easier to work with.

Lightly heat the sheet you have weaved and roll it on to the core candle. Using the heat from your hands to secure the ends together. At the top carefully alternate the ends evenly around the candle. This looks great when you use contrasting color between the core candle and the beeswax weave.
